

MICRO-CONSULTING
For North Carolina

Business Solutions

MCforNC is a nonprofit consulting firm providing consulting services to other nonprofits. Our mission is to provide students with relevant work experience while helping our nonprofit community be sustainable.

Custom Database

As your organization grows and develops, you will need a database that not only collects and stores information, but also grows and develops with you.

- Are you tired of manually entering the same data entry in multiple databases?
- Do you need a database that integrates with forms on your website?
- Do you need a database you can access anywhere, with any computer?
- Do you need a database for volunteer management?
- Do you need a database that can store contacts, send newsletters, collect forms from your website, maintain your donors & donations, and produce dynamic analysis reports in one place?

MCforNC can help you develop or re-develop a customized strategic technology plan to ensure your organization's technology infrastructure is exactly aligned to help you meet your needs and reach your goals. Because we customize our solution for each of our clients, you can rest assured that our solution will be in harmony with your organization's budget and staff expertise.

How does the process work?
